

Your Added Value

Ease of communication

You have only one point of contact. Our professional team supports your project from its conception throughout its entire life cycle. We keep you informed throughout the process and implement your requirements.

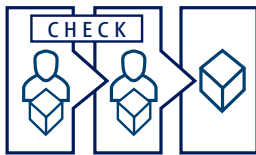

Fewer interfaces

Save time and costs and increase flexibility by reducing the number of interfaces. We offer overall value stream optimisation in the production and information process.

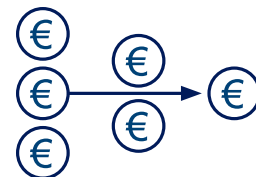

Optimized process and project management

We assist you at all stages of vertical integration, from components and electronic assemblies to the complete system. Your process landscapes will be perfectly aligned with ours.

Effective quality assurance

Your quality expectations will be met in full. Continuous improvement processes increase material and process quality.

Optimised overall costs

Under-one-roof system assembly of all service modules avoids multiple activities and so reduces costs.

The Following ZVEI Members ...

- Offer services tailored to customers' requirements.
- Are committed to quality and environment management.
- Have the expertise required to perform the services.
- Determine the desired results and performance indicators together with the customer.

A System is More than the Sum of its Components

EMS Partner as System Supplier

PCB and Electronic Systems Division

EMS Partner as System Supplier

Our Services

Nowadays customers and suppliers alike understand the term EMS (electronics manufacturing services) to mean far more than conventional electronics production.

The forward-looking EMS partner offers a comprehensive service portfolio along the complete value chain and throughout the entire product life cycle. From the idea to delivery to the customer or customer's customer.

Today's EMS partner is responsible for providing the necessary processes/services/materials management including infrastructure and production capacity and thus offers added value to the customer.

Services from Your Product Ideas to the System
