

NPI – The Fast Way to the Series Product

A leap ahead

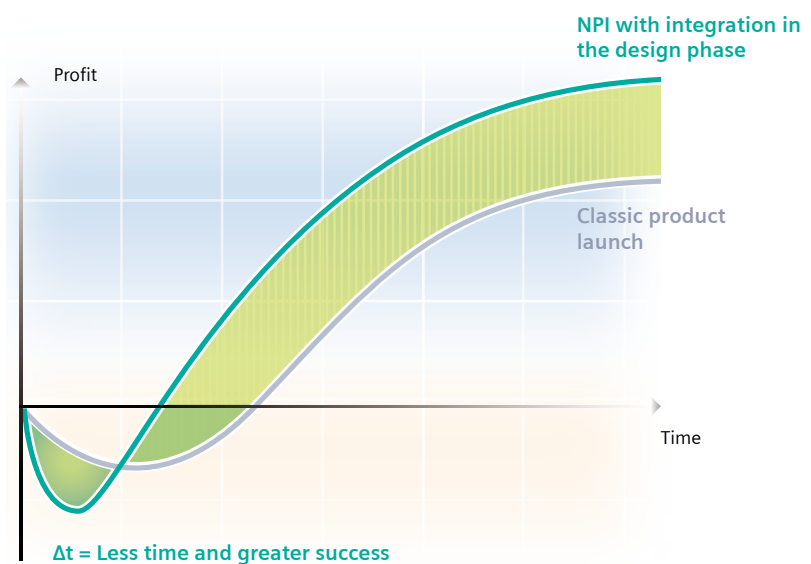

An initiative of the PCB
and Electronic Systems
Division within ZVEI

Services in EMS

• New Product Introduction (NPI*) Definition

NPI is a service package offered by the EMS companies with the objective of implementing optimum series production for your product innovations.

• Why NPI?

- Joint product development and implementation process
- Timely risk assessment and minimisation
- Optimised development times and costs through availability of the relevant methods and technical expertise
- Continuous consideration of the product life cycle

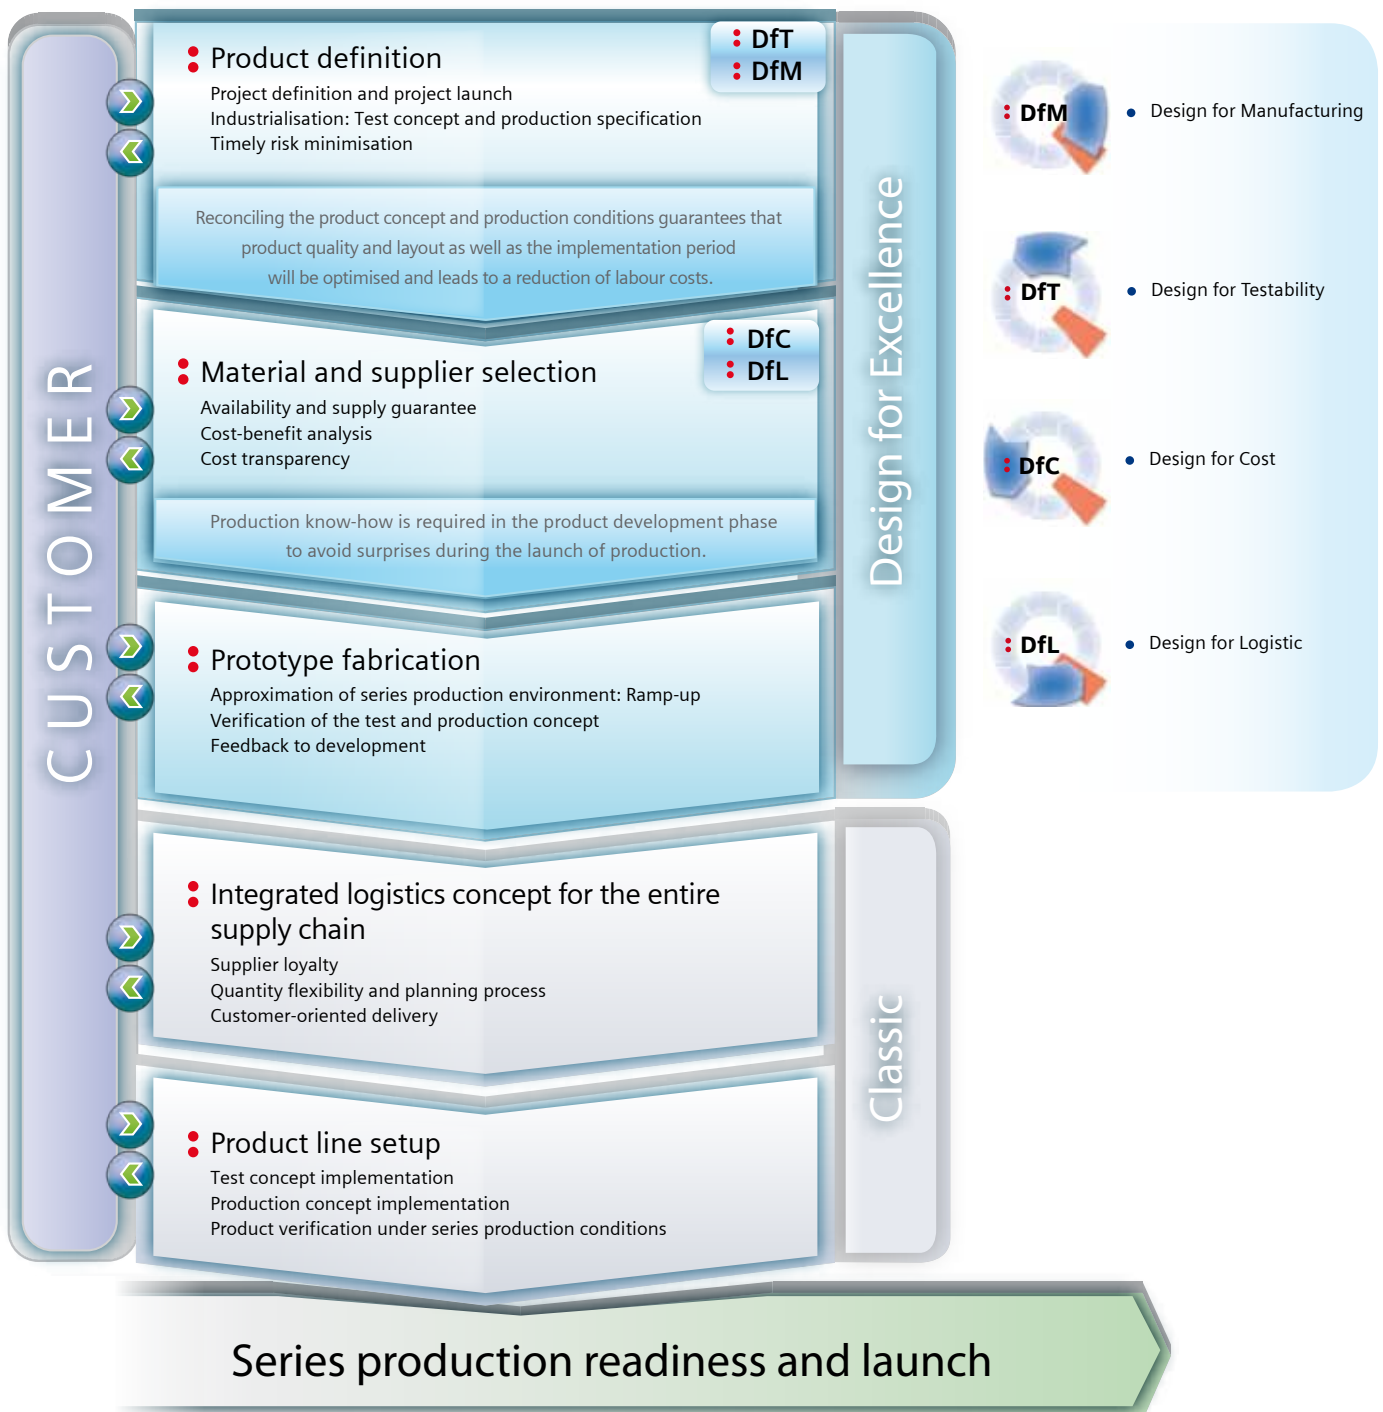

The companies organised in the ZVEI of the **Services in EMS** Initiative are able to accomplish all of this by covering the entire value creation chain.

* New Product Introduction

Design for Excellence

Faster, more efficient and of higher quality

By involving the EMS partners early on, starting in the design phase, we are able to contribute our expertise in a timely manner. This saves you time and money while improving the quality of your products.

• ZVEI Members

• The following ZVEI members

- Offer services tailored to meet the needs of customers
- Have the expertise required to perform the services
- Are committed to quality and environmental management
- Establish the desired results and performance indicators in cooperation with the customer
